## **Github for windows:**

1. Download github for windows using <https://windows.github.com/>.
2. Click on clone to desktop → launch application
3. Github window will open and will be asked for a github repository in your system.
4. Select the directory where you want to place the files and click ok.
5. The files will be downloaded in the directory.

Upload files to Github page:

1. Create a profile in the github page and clone to desktop.

2. Place the files in the github repository selected in your system.
3. The github window on your system identifies the new files placed automatically .
4. Select the files to commit and add comments so that the commit button is enabled.
5. Once commit is done,use sync at the top corner of the window to sync files to your github page.

For non windows users, please follow <https://help.github.com/articles/set-up-git> link
