Installing .apk file from github directly to your phone:

Link: <https://github.com/danna123/CastOffline>

- 1.Open the Applications menu and click on the Settings application.
- 2.Make sure that the first selection, Unknown Sources, is checked so that you can install an .apk file .
- 3.Open the browser on your laptop and navigate to github page for download.(use the option download as zip file and get the .apk file from it).
- 4.Send this .apk file to phone or copy it to the sd card.Install using a file manager or use google drive to store the .apk file and download it to mobile or use a dropbox.
- 5.Click on the .apk file.A new screen showing the selected application's name at the top is displayed.To install the application, just click on the Install button on the bottom of the screen.

6. Now a screen is displayed once the installation is complete and search for CastOffline in the list of apps.
